

Cross Reference Guide

Triacs, SCRs, DIACs, SIDACs, and Rectifiers

(Suggested Littelfuse Replacements for JEDEC and Industry House Numbers)

How To Use This Guide

This Cross Reference Guide will help you determine the competitive products that Littelfuse supplies on either a DIRECT REPLACEMENT or SUGGESTED REPLACEMENT basis.

Littelfuse offers replacements for most competitive devices. If you do not find a desired competitive product type listed, please contact the factory for information on recent additions to this list.

On the following pages, listed in alphanumeric order, you will find:

- Competitive product number
- Littelfuse device part number
- “D” indicating the Direct replacement (Littelfuse device meets or exceeds the electrical and mechanical specifications of the competitive device); “S” indicates a Suggested replacement (The suggested replacements in this guide represent the nearest Littelfuse equivalent for the product listed and in most instances are replacements. However, Littelfuse assumes no responsibility and does not guarantee that the replacements are exact; only that the replacements will meet the terms of its applicable published written specifications. The pertinent Littelfuse specification sheet should be used as the principle tool for actual replacements.)
- Littelfuse package type

For additional assistance, contact your nearest Littelfuse distributor, sales representative, or the factory.
